Final Response ATIPP Access Request 25-029

Decision

The Department of Environment has searched the records for the department's Joint Health and Safety Committee and did not identify records responsive to Access Request 25-029. However, the Department was provided with a record from the Public Service Commission (PSC), which details the number of workplace inspections, and the hazards identified for the Department beginning in April 2024. The additional details from the request are not part of the reporting.

The final response on the information is as follows:

Access Granted in Full

The Department of Environment has granted access in full to information relating to the request noted below:

Seeking the total number of hazard assessments (as defined by Public Service Commission) conducted by the department on a year by year, and month by month basis. Seeking a further breakdown of: the number that have been reviewed by the Deputy Minister, the number that have are under review by the Deputy Minister, the number that have been resolved, the number that are still on-going, the number that have been referred to health and safety committees (as defined by Workers' Safety and Compensation Act sections 36 to 38), the number that have been referred to worker health and safety representatives (as defined by Workers' Safety and Compensation Act section 39), and the number that have been referred to Public Service Commission. Timeframe: January 1, 2019 - April 2, 2025.

Please see the response from the applicant providing clarification on hazard assessments:
I am guessing that department will ask "what does 'hazard assessment' mean?"

25-029

I don't know.

However, Health Safety and Wellness branch of Public Service Commission referred to hazard assessments in a meeting we had with them on April 3, 2025. Whatever they define as a hazard assessment is the definition I'd like provided.
