SUBJECT: Final Response Access Request 21-447

Decision

The Department of Health and Social Services has searched Population and Public Health Evidence and Evaluation and has no records responsive to Access Request 21-447. The final response on the information is as follows:

No Records Found

The Department of Health and Social Services has no records responsive to this request:

As Pfizer recently released data to the FDA regarding their mRNA vaccines showing tens of thousands of serious adverse health effects after a single dose as well as second doses (including 1200+ instances that were lethal): What peer-reviewed science and/or long-term independently verified data (1, 2, 3, 5, 10 years) was used by the Yukon to determine that Pfizer's mRNA vaccine is safe at any dosage level for those under the age of 18 - for all ages and weight variations of those in the youth targeted age group? Or is it the official position of the Yukon government and/or Yukon's Health Department/Chief Medical Officer(s) to vaccinate everyone and inadvertently come across serious adverse health effects sometime in the indeterminate future?

Timeframe: November 30, 2019 - December 1, 2021

The Department is reliant on the national regulatory approval process through Health Canada. For information related to the approval process at Health Canada, here is a link to their website:
