Final Response ATIPP Access Request 22-465

Decision

Yukon Housing Corporation has searched the Building Maintenance branch and has provided a response below for Access Request #22-465. Our final response on the information is as follows:

Access Granted in Full

Yukon Housing Corporation has provided access in full to records relating to the request noted below:

Please provide all radon testing data conducted at Yukon Housing Corporation public housing properties. Radon testing data should include, but is not limited to: Year of test; Location of test; Test result measured in becquerels per metre cubed (Bq/m³); What mitigation measures were taken; Year of mitigation; Any post-mitigation test results. If no centralized database exists, please provide copies of the test results in electronic format. Timeframe: January 1, 2008 to present. Please note that the timeframe for this request is flexible; I have tried contacting your department to get more information on if and when radon testing occurred but have not received a response. Please contact me upon receipt of this request so that we may discuss its parameters. Timeframe: January 1, 2008 - October 11, 2022

YHC has only conducted one full round of testing on YHC owned units in 2017/18 and spent the last 4 years remediating all affected units (>200Bqm3) and is currently undergoing a second round of follow-up testing to ensure all YHC owned units are below the national standard. Prior to 2017 YHC did not test YHC owned units but offered free test kits to anyone wanting to test.

- See attached YHC owned unit master Radon Testing information sheet. The main sheet was radon testing to identify high priority units.
- The mitigation table sheet shows pre and post mitigation levels.
- Long term testing was to ensure initial test results were accurate on high priority units.

- Radon testing 2021 was a follow-up on mitigated units to ensure mitigation was continuing to work properly on identified units.

There will be no charge for this request.
