

YUKON TOURISM VISITATION REPORT

JANUARY 2016

The Yukon Tourism Visitation Report is produced monthly and comprises key indicators of tourism, including visitation estimates, border crossings, visits to Visitor Information Centers and airplane passenger volumes.

HIGHLIGHTS

In January 2016:

- Border crossings through Canadian Border Services Agency ports of entry increased 27% (763 people) over January 2015.
- Air arrivals at Erik Nielson Whitehorse International Airport were up 3% compared to January 2015.

YUKON MONTHLY TOURISM INDICATORS: YUKON VISITOR TRACKING PROGRAM

Calculated by Tourism Yukon, the Yukon Visitor Tracking Program (YVTP) provides an estimate of the number of visitors entering Yukon. The YVTP is a volumetric model, which includes border crossings, highway traffic counts, train passenger volumes and air passenger volumes. The model excludes Yukon residents.

The Department of Tourism and Culture utilizes a number of indicators as inputs into the Yukon Visitor Tracking Program model to estimate total visitation to the territory. In 2015, a number of the data sources encountered significant challenges which may have impacted their reliability. As a result, the Department of Tourism and Culture is unable to provide an estimate of total visitation to Yukon at this time.

YUKON MONTHLY TOURISM INDICATORS: BORDER CROSSINGS

Provided by Canada Border Services Agency, the data reports the volume of people entering Canada through designated land or air ports of entry. Figures do not include people travelling in commercial vehicles, by train or marine traffic.
