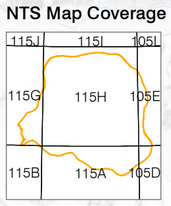
- Champagne & Aishihik
- Little Salmon/Carmacks
- Kluane
- Ta'an Kwächän
- Kwanlin Dun

NTS Map Coverage



Core Range

Over 95% of the bison population resides year round within the core range. Core range was determined through aerial surveys and radio-telemetry conducted by the Yukon Department of Environment. Although it is possible to encounter small numbers of bison outside the core range, the farther outside the core range you travel, the less likely you are to find bison.
