Black Bear (spring range)
- Territorial capital
- Community
- Unincorporated area
- Highway/primary road
- Secondary road
- Tertiary road
- Trail
- International boundary
- Interprovincial boundary

Wildlife Key Areas (WKA) are compiled by the Yukon Department of Environment WKA Inventory Program (2013), against 1:250,000 NTDBs from various data sources. Key Areas are based on observed locations of wildlife at key times of year, not on habitat assessment. With new information, boundaries and designations of Key Areas can change and additional Key Areas can be identified. Furthermore, Key Areas are not the only sites important for wildlife. Other information sources can identify sites important for wildlife for reasons outside the scope of the WKA Inventory Program. Updates to Key Areas occur only periodically. For the most current information, please consult with the Regional Biologist for your area of interest. If you have questions or would like to contribute to the WKA database, please contact the WKA Inventory Program (wka@gov.yk.ca).
